AI doesn't just require tons of electric power. It also guzzles enormous sums of water.

BY **JANE THIER**

September 23, 2024 at 2:44 PM EDT

In order to shoot off one email per week for a year, ChatGPT would use up 27 liters of water, or about one-and-a-half jugs.

- “...tax evasion is estimated to be worth \$23 billion in the countries of the Global South...”
- International Taxation from Global South Perspectives, 2021 Report. South Centre (SC) in collaboration with the Policy Center for the New South (PCNS)

FEBRUARY 28, 2024 BY WOUTER VAN DE KLIPPE

The Global South is fighting for a voice in global tax rules

Wouter van de Klippe is a freelance journalist and Public Policy graduate based in Europe. He's particularly interested in organised labour, economic, social, and environmental justice, and social welfare states.

Since 1954, a "[rich countries club](#)" of the Global North have set the rules of the global tax system through the Organisation for Economic Co-operation and Development (OECD). Now, countries of the Global South are successfully fighting for more equal say.

Who pays?

“In economics, taxes fall on whoever pays the burden of the tax, whether this is the entity being taxed, such as a business, or the end consumers of the business's goods.”

This is an ethical discussion:
